

*a<sup>2</sup> b<sup>3</sup>*

16. (once amended) An electrostatic sticker kit comprising:  
at least one blank sheet of an electrostatic sticker print medium; and  
a charge donor, other than said sticker print medium, for depositing an electrostatic charge on either side of said sticker print medium after said sticker print medium has been printed with an image;  
wherein said at least one blank sheet of sticker print medium and said charge donor are associated together in said kit.

Please <sup>✓</sup>add the following new claims.

*a<sup>3</sup>*

22. (new) A method of producing a customized electrostatic sticker, said method comprising:  
placing a user-selected image on a host computer that is connected to a printer;  
supplying a sticker print medium to said printer, said sticker print medium comprising an electrostatic charge maintained on a surface of said print medium by a protective cover disposed over said surface of said print medium; and  
driving said printer with said host computer to print said user-selected image on a sheet of said sticker print medium.

23. (new) The method of claim 22, further comprising generating said user-selected image using application software on said host computer.

24. (new) The method of claim 22, wherein said printer is an inkjet printer.
